

Brigade Boys and Girls Club Energy Audit

As part of what we hope to be an ongoing project, Engineering for the Earth performed a site visit with the Brigade Boys and Girls Club in Wilmington, NC.

On Tuesday July 13, 2010, Robert Weaver, PhD and JD Lovering, LEED AP met with Jeff Green, Director at the Brigade Boys and Girls Club in Wilmington, NC

We spent 3 Hours touring the facilities and discussing operations with Jeff Green. Our organization is now working a summary report to include 4 sections relating to facility upgrades and improvements. In this report we will highlight 2 projects where the facility either has allocated or is in the process of obtaining funding. Our report will then outline short term, small budget modifications that can be implemented immediately with minimal funding. Finally we will identify more expensive projects that can be implemented as the funding becomes available.
